

## Home Contents Calculator

### Helping you get the right cover for your contents

When it comes to insuring the contents in your home, one of the most difficult things is calculating their true replacement cost. That's why we have put together a **Home Contents Check Sheet** which is designed to help you make sure that all your contents are covered for their correct replacement value.

### Completing the 'Home Contents Check Sheet'

The Check Sheet groups home contents into logical sections, all you need to do is estimate the total value of your contents for each section and write it in.

The Check Sheet should be completed prior to placing your Contents Insurance policy.

### What about extremely valuable items?

It is important that you consider itemising any possessions of exceptional value. By doing this, you will receive extra cover for these items so if they suffer a covered loss, we can repair them or reimburse you for an amount up to the new value we have agreed upon.

#### Examples include:

Jewellery, artwork, sports gear i.e. bikes, skis etc.
